The TALKING SCHOOLHOUSE™ SERIES

NEW

$TALKING MONEY$

YOUNGSTERS LEARN THE USE AND VALUE OF MONEY.

AGES 5 - 9

A helpful human voice identifies U.S. coins and bills, emphasizes money values, and helps children use money and make change in simulated purchases. Early readers as well as proficient readers will find this effective program an excellent way to learn money skills. The program is divided into five sections:

I. MONEY TALKS identifies the coins and bills.

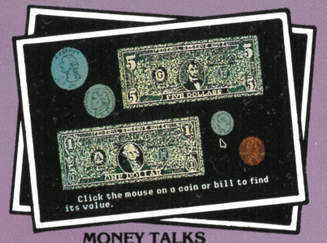
II. MONEY VALUES demonstrates the value or equivalents of coins and bills.

III. ADDING COINS provides valuable practice in adding coins.

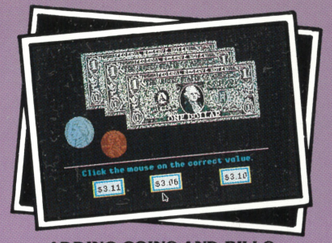
IV. ADDING COINS AND BILLS gives practice at a higher level.

V. CASH REGISTER simulates the purchase of items in a store. Change must be calculated from the prices and money paid for items.

- A real human voice helps youngsters identify coins and bills.
- Money comes alive through super Hi-Res graphics & sound.
- Children may review and proceed at their own pace.
- Choose from five activities in the simple, easy-to-use format.



MONEY TALKS



ADDING COINS AND BILLS

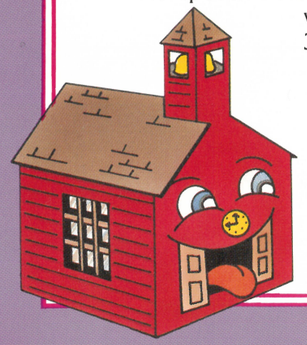
The Talking Schoolhouse™ Series

represents the most advanced technology in the areas of human speech and super high-resolution graphics for educational software. Disks speak on their own . . . No speech board or any additional hardware is required — only a 3.5″ disk drive.

Developers working with proven educational concepts have recorded actual human voice and electronically digitized the sound into the computer program. The result is perfect, natural-sounding speech—not a synthesized computer voice that only confuses youngsters.



Covering ten basic subject areas, Talking Schoolhouse brings the personal and reassuring voice of a real person into the computer learning environment.
